Reviews

An extremely wonderful publication with lucid and perfect reasons. It typically will not expense too much. You are going to like the way the blogger compose this publication.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Hemorrhage and thrombosis are major hazards for pregnant women and their newborn infants. This book is concerned with the developmental mechanisms, the diagnosis and treatment, as well as the prevention of these hemorrhagic and thrombotic disorders. The topics discussed in this volume, (1) perinatal hemorrhage in mothers and their offspring; (2) coagulation disorders complicating pregnancy; (3) neonatal intracranial hemorrhage; and, (4) vitamin K deficiency in the neonate, will help bridge the gap between basic scientists and clinicians and between the pediatrician and the obstetrician. Hopefully, all those concerned with preventing these disorders will be stimulated by the information and questions raised in the following presentations. Acknowledgements We wish to thank Professors Takeshi Abe (Vice President, Teikyo University), Nobuyoshi Shinagawa (Hirosaki University), Hiroaki Soma (Tokyo Medical College), Tamotsu Miyazaki and Keisuke Sakurada (Hokkaido University) for their helpful advice.
