

## Parallelization of the Uncertainty Analysis in Environmental Models

Filesize: 6.27 MB

### Reviews

*This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.*

*(Mr. Grant Stanton PhD)*

## PARALLELIZATION OF THE UNCERTAINTY ANALYSIS IN ENVIRONMENTAL MODELS

VDM Verlag Jun 2008, 2008. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - This book describes an approach to construct a decision support system from results of a non-point source (NPS) pollution model using high performance computing, and by distributing work load between client and server. A review of NPS models and a survey of techniques used for constructing decision-support software systems are given. The NPS model selected for this investigation was the Guelph model for evaluating effects of Agricultural Management systems on Erosion and Sedimentation (GAMES). The graphical probability model consists of a network of nodes that represent individual parameters, or variables for fields, in a watershed. Directed links indicate relationships between variables. The complete graph thus has directed links that follow the drainage network of the watershed. The relationships, or links, between the nodes are quantified by way of data derived by Monte Carlo simulation of the GAMES model and by deterministic functions as specified in GAMES. Probability models were developed for two Southern Ontario watersheds, and the Guelph cluster of Shared Hierarchical Academic Computing Network (SHARCNET) was used as a high performance computing environment. 104 pp. Englisch.
