

Practical Problems in Mathematics for Carpenters (Applied Mathematics)

By Huth, Mark

Cengage Learning, 2005. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service!

Summary: This widely used text/workbook teaches the practical mathematics essential the building construction and carpentry trades. The book features short units that begin with a brief explanation of an important math principle followed by straightforward explanations and examples that are worked out in detail so readers can see first-hand how to perform the functions involved. Basic mathematical problems relevant to the construction trade are accompanied by clear-cut illustrations and together give readers the opportunity to apply and practice math principles common to carpentry.

Reviews

This publication may be really worth a go through, and a lot better than other. It really is writter in simple terms and never difficut to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
