MIT Press Ltd, United States, 1995. Paperback. Book Condition: New. 304 x 230 mm. Language: English . Brand New Book. *see*, a quarterly journal published by The Friends of Photography, presents striking photography and fine writing that explore the impact of lens-based images on contemporary culture. *see* places the medium of photography within the broad discourse of visual culture, including art, advertising, mass media, and literature. Unlike conventional photography-related journals, *see* lets photographers speak for themselves about their work and gives writers the freedom to address visual issues across a broad spectrum of concerns. Photographs ranging from contemporary to historical, as well as images from lens-based media and new electronic environments, are featured in tandem with fiction, poetry, essays, and critical commentary that respond to our image-dominated surroundings. In addition to beautifully reproduced portfolios of photographs and insightful, provocative writings, each volume of *see* includes a section of artist s pages, reviews of current exhibitions, books, and multimedia titles; and regular columns that address the formative and functional aspects of visual culture.
