This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907-01-01 Excerpt: .each month and during the entire year. and at the hour of the daily maximum temperature. In tabulating all thunderstorms which passed over Baltimore during a period of 28 years, a total of 678, we find the following distribution by months: Fio. 77.--The Frequency and Distribution of Thunderstorms. The diagram represents over 650 thunderstorms which passed over Baltimore in the 30 years from 1871 to 1900. The density of the shading increases with the frequency of the storms, showing a maximum frequency between 3 p. m. and 5 p. m. In the month of July. For the hours of the day and month during which less than five storms were recorded in 30 years, the actual number is indicated by the small dots. The figures attached to the curved lines represent the total frequency in 30 years. Fio. 78.--The Average Monthly Frequency of Occurrence of Thunderstorms....

Reviews

This book is definitely worth acquiring. I have gone through and so I am certain that I will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after I finished reading this publication in which actually altered me, change the way in my opinion.

-- Andres Bashirian

Comprehensive guide for publication fanatics. This really is for all who state there had not been a well worth reading through. I discovered this ebook from my dad and I encouraged this book to find out.

-- Lacy Goldner
