The wax-workers will supply all the comb needed for brood and honey, the maximum of strength will be kept up, and the only reasonable limit to the amount of surplus honey will be the amount of the supply in the flowers. The periods here given as governing the different operations are necessarily variable, as they depend on circumstances not named, but are about the average, in a normal colony, during the honey-harvest. We have reports of the Italian bee reaching its imago state in eighteen days, and in other instances it is lengthened to twenty-four; but, as we conceive, these fall under the head of irregularities, and indicate an abnormal state, of the colony. For a fuller elucidation of this theory the articles entitled Why do Bees construct Queen-cells? and The Genesis of the Honey Bee, should be read in this connection. DOES A QUEEN STING HER ROYAL RIVAL? BY MRS. ELLEN S. TUPPER, OP IOWA. This is a question which I would like to have answered by any one who has any knowledge of the matter. We find interesting accounts of the battles of rival queens in works upon the bee, but we find also various other things given as facts which our observation does not confirm...
