TheClassics.us. Paperback. Book Condition: New. This item is printed on demand. Paperback. 176 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: . . . chapter xxviii navigation It is quite impossible in a single chapter to give more than a general idea of the art of navigation. An attempt will be made to describe only the salient points and leave the reader to follow up the explanations and details to be found in any modern book on navigation. Much of the art of navigation has been reduced to a science, and science requires accurate instruments for the purpose of collecting data to be used in mathematical calculations. Instruments used in navigation include the following: compass, chronometer, sextant, log, lead, parallel rulers, dividers, barometer. Every navigator should be supplied with a good pair of day glasses and a pair of night binoculars. Charts of the vicinity are of course essential. The above is not the complete outfit provided a modern man-of-war; it is the lowest minimum for navigation. Persevering practice is required to make one expert in the use of nautical instruments. The navigator uses the nautical mile as the unit of distance. The geographical mile is the length of a minute of arc of the earth's equator. It is 6087. 2 feet. The nautical mile is the length of a minute of arc of the earth's meridional circumference. The nautical or sea mile varies in length with the latitude. At the equator it is 6046 feet, increasing to 6109 feet at the poles. This is of no importance to the navigator who uses the mean, or 6076. 8...
